Signature:
Date: DD / MM / YEAR

WORKSAFE USE ONLY				
File:	Entered:	Number:	Invoiced: DD / MM / YEAR	Fee received: DD / MM / YEAR

Application for approval of a declared article

- 1 A series or more than one model of article may be included in a single approval application, providing that they are of the same fundamental construction and are specifically included in the supporting test reports.
- 2 This short description should be brief but clearly and uniquely identify the article being approved. This description or the essence of it will be used on any approval certification issued together with representative photographs of the article.
- 3 An invoice for the prescribed application fee, which is \$654.22 for an approval or \$408.89 for a modification, will be sent to the applicant. **Note:** No work will be started on the application until full payment has been received and processed. Once paid, the fee is non-refundable even if the application is unsuccessful for whatever reason.
- 4 For small articles a sample for examination is desirable; for larger articles a specimen may not be required provided that there are adequate photographs detailing all aspects of construction.
- 5 The detailed technical description to be supplied with this application should include dimensional drawings and representative photographs of the complete article and significant subassemblies.
- 6 The information must be supplied in English and any supporting documentation, including test reports to relevant standards, must be less than five years old. **Note:** Approval duration may be limited by the age of the oldest supporting test report.
